RE...

SEP 17 2001

To whom it may concern,

Please consider this merely a personal proclamation. I have lived in Reno, Nevada for two years and will be moving to Las Vegas, Nevada next month. Due to such a powerful work force. But will surely relocate back to California or elsewhere if nuclear waste is brought to my backyard. Nobody, agency or other sorts can convince me that the Yucca mountain repository would be a safe + secure plan for the state, nation or world.

I beg you to reconsider this plan and leave it safely where it is currently located and re-establish a new progressive commitment to reusible energy. The truly only hope for the future.

Thank you,

Ralph G. Smith
