NEVADA NATURAL HERITAGE PROGRAM **RARE PLANT FACT SHEET** Compiled 25 June 2001

Astragalus lentiginosus Douglas ex Hooker var. *sesquimetralis* (Rydberg) Barneby

SODAVILLE MILKVETCH

FAMILY: *Fabaceae*, the legume family. **SYNONYMS:** *Cystium sesquimetrale*

STATUS: **Heritage Program SENSITIVE LIST, ranks: G5 T1 S1**
USFWS/ESA: species of concern, formerly CANDIDATE or PROPOSED. **STATE OF NEVADA:** FULLY PROTECTED. **BLM:** Special Status Species in Nevada. **USFS:** none. **NNNPS:** THREATENED.

POPULATION CENSUS (NEVADA): 2 occurrences mapped; total estimated **individuals 700**, total estimated **area 10.1 ha (25.0 ac). TREND:** unknown.

IMPACTS AND MAJOR THREATS (NEVADA): Private or commercial habitat development, dredging and other water diversions, animal grazing and trampling, off-road vehicle use, competition with invasive weeds, small population numbers and area, impacts to pollinator populations.

INVENTORY EFFORT (NEVADA): Nearly exhaustive surveys of potential habitat have revealed only the two known Nevada populations. Most recent entered survey 1992, average year of last survey 1992.
Years since last entered survey (percent of mapped records at various survey ages): **6-10 yrs:** 100%.

LAND MANAGEMENT (NEVADA): private lands.

RANGE: Mineral and Nye counties, Nevada; also in CA. Maximum Nevada **range dimension 65.5 km (40.7 mi).**

ELEVATIONS RECORDED (NEVADA): 4150-4705 feet (1265-1434 meters).

HABITAT (NEVADA): Moist, open, alkaline hummocks and drainages near cool springs with Distichlis spicata, Sarcobatus vermiculatus, Sporobolus airoides, etc. Aquatic or wetland-dependent in Nevada.

PHENOLOGY: flowering spring. Range of most frequent **survey months:** June-September.

LIFE-FORM AND HABIT: perennial herb.

DESCRIPTION: not available (see references).

PHOTOGRAPHS: Morefield (1993); Nevada Natural Heritage Program images web page (1998-present), slide collection (1986-present), and files.
ILLUSTRATIONS: Barneby (1989), Mozingo and Williams (1980).
OTHER GENERAL REFERENCES (listed separately): Barneby (1964), Hickman (1993).

NEVADA RARE PLANT ATLAS

INDEX TO MAPS AND FACT SHEETS

(8 August 2001)

This index lists all plant taxa on the Nevada Natural Heritage Program's at-risk and watch lists, **whether or not included in the current Nevada Rare Plant Atlas**. Atlas fact sheets and maps are available and linked for over 80% of these taxa. **PLEASE NOTE THAT INFORMATION FOR SOME SPECIES MAY BE INCOMPLETE OR OUT OF DATE. Please read the atlas text sections** for further information on the **sources and limitations of the data** represented on the maps and fact sheets, **and for general references** cited only in brief in the fact sheets. **Fact sheets** are saved in PDF format and require the free Adobe® Acrobat® Reader plug-in if not already installed on your system. **Images**, when available as links from our images page, are indicated with a link to that page, following which you must scroll manually to the species of interest. **Updated maps and fact sheets** will be generated and posted as time and resources permit, as the data comprising them are constantly being generated and updated.

Map Printing and Display: Due to storage limitations, the map images linked to this web page are **not** reproduced at their original printed resolution (600 dpi in 8.5x11 inch format). They are instead produced at 105 dpi (dots-per-inch) resolution, which results in grainy but acceptably readable output when printed or displayed. When you click on a map link, the **first image** that displays is **formatted for best printing** results, **even though** the screen display may appear degraded. **To best approximate an original printed version:** change the page set-up or format in your browser to eliminate all headers and footers and change all margins to their smallest possible value, then **print pages 1 to 1** of this version. Recent versions of MS Internet Explorer or Netscape browsers printing to laserjet printers should work well. If you wish to view the map in its **best display quality on your screen**, simply click anywhere in the first map image and you will receive a second image at maximum available resolution.

	Scientific Name	Common Name	Family
	Abronia nana ssp. *covillei*	Coville abronia	Nyctaginaceae
image	*Agastache cusickii*	Cusick hyssop	Lamiaceae
	Agave utahensis var. *eborispina*	ivory-spined agave	Agavaceae
image	*Agave utahensis* var. *nevadensis*	Clark Mountain agave	Agavaceae
image map sheet	*Angelica scabrida*	rough angelica	Apiaceae

	map	sheet	*Antennaria arcuata*	meadow pussytoes	Asteraceae
