Comments: In light of the attacks of September 11th on US soil, can you honestly believe that transporting the vast quantities of nations nuclear waste across the county is a safe and prudent course of action? The terrorist's "M.O." is to use American assets to kill innocent civilians on a wholesale basis. Transporting the most toxic substances known to man will transform the entire country into a carnival shooting gallery for a enterprising terrorist sleeper cell. I have been told the containers are "robust" so was the World Trade Center. It was built to withstand the impact of a Boeing 707. How many minutes did the buildings stand? They have the artillery they need. They have proven their craftyness and dedication to their warped cause.

Why bother with a missile defense shield when we are delivering a nuclear disaster in our bread basket. It is a low cost bonanza for the forces that wish to destroy us.

Extremely Concerned,

George Boniface
