--> Comment Text :  
To Whom It May Concern,

It is time to overcome the political roadblocks to a logical, safe, and recoverable method for storing radioactive wastes. (The issue of recoverability is important, not for safety reasons, but for the time when the country requires the immense amount of energy that is being buried in the ground vice reprocessed.)

Nuclear power is the cleanest form of major energy production, bar none, including wind and solar power (when the hazardous wastes they produce is accounted for). I'm sure you have those facts available to you.

I recommend approval of the Yucca Mountain site and swift encouragement of additional nuclear power plants.

Sincerely,

John A. Camara
