OCT - 8 2001

Subject: Yucca Mountain Storage Facility

Part of Records Package / Supplement / Correction

> I am in favor of utilizing the Yucca Mountain site for nuclear fuel
> storage.

>
> It seems that we as a people have an obligation to ensure cheap,
> reliable, and clean energy is available for our economic well being, today
> and the future. I can't imagine that we are so short sighted and ignorant
> that we as a people won't believe long term waste storage can be solved.
> Technology in a 500 years will be such that permanent disposal of this
> waste will be realized. I also believe land reclamation of the Yucca
> Mountain area will render the site as if nothing ever occurred.
> Technology available today has taken man to the moon, harnessed the atom,
> and allows communication of every media in all corners of the world.
> Approximately 500 years ago our arrogance led us to believe that man was
> the center of the universe, we also believed that flying was only for the
> birds and the earth flat.

>
> Don't give in to other's political agenda, be realistic! Vote in
> favor of Yucca Mountain Fuel Storage.

>
>
> Frank W. Trikur
