Subject: Please Approve Yucca Mountain Site

Part of Records Package / Supplement / Correction

The YUCCA mountain site for radioactive waste needs to be approved. whether or not a person supports nuclear power is not at issue. We already have high level radioactive waste that needs to be stored in a location safe for future generations. We can't leave this decision for the next generation. Not making a decision on this issue is irresponsible.

It should also be noted that there is not an infinite supply of oil and gas and given the current world situation to potential for disruption has increased. We need energy to support the American way of life. Nuclear presents the current best alternative to fossil fuels.
