553283

To Whom It May Concern:

Please note my objection to the Yucca Mountain Repository Project currently underway at Yucca Mountain, Nevada.

I do not believe Nevada should be wasteland for all of the spent nuclear fuel and waste. I believe there are other solutions to this problem. Transporting all of this dangerous material across our country is not only unwise, but extremely dangerous.

Over the years, I have been watching and reading anything and everything I find about nuclear waste and spent fuel. Each report discusses the dangers and toxicity of such materials. With our modern technology, I believe there are other answers to this "dump problem."

Regards,

Robert Blood
