Comment Text :
-->DOE has not conducted an adequate assessment or analysis of the best transportation routes throughout the nation nor have they done an adequate job of informing the public of possible highway and rail transportation routes in order to get public input on the proposed transportation plan. A mere 52 day comment period is inadequate regarding a policy decision that will affect millions of people who will be affected by the trucks or trains which will pass through their communities carrying high level radioactive waste. DOE needs to do a better job.
