Las Vegas, NV 89134

To Whom It May Concern:

1 [ARE YOU KIDDING ME??? This was my thought when the box containing your absurd amount of documentation, called an "Impact Statement", in favor of the nuclear waste to be deposited at Yucca Mountain and Railroad proposal arrived at my doorstep. What a waste of trees and money it is to print out and actually mail these voluminous documents for review!! Yes, I have reviewed and commented on previous documents and continue to be vehemently opposed to Yucca Mountain, but who has time to read approximately "2 feet" of printed documents?

You can do all the studies you want and make the statistics work "for" your purposes, but you are not going to change my mind. I remain **OPPOSED** to this project. I am only one of the thousands who feel that you will feed the public any information you choose to further your project. You will never convince me that this project will minimize our threat of terrorist attacks to radioactive materials – maybe if you live in another state! Not if you continue to live in Nevada and this proposed fiasco becomes a reality!

Please consider that there are many people who will not want to live in the backyard of the nation's most dangerous waste materials OR in the line of fire for these materials to reach their final destination. There is no amount of propaganda that will make me believe our groundwater will not be affected. The future of our children, grandchildren and future generations is at risk. If this project becomes a reality, I will do everything in my power to enable my family to move out of Nevada. I have lived here since 1992 and have seen many, many changes, but this is one that I DO NOT want to stay around to see come to fruition.

Please do not waste any more money sending me these ridiculous volumes of reading material, however, anything reasonable will be read. I will continue to oppose your project as long as I am given a voice.]

Sincerely,

Debra Frost
