

17 KATHY LeFEVRE: My name is Kathy LeFevre. [I'm a |
18 Lincoln County resident. I live in the Highland Knowles
19 subdivision. And I was looking at the maps earlier on one
20 of the proposed quarries that the other gentleman
21 mentioned.

22 And I doubt that there are very many
23 Lincoln County residents and I'm quite sure there are no
24 Highland Knowles residents that are aware that one of
25 these large quarries that are proposed is less than two

36

1 miles from our houses.

2 Now, I would like to see that if these
3 quarries are proposed that these neighborhoods that are
4 going to be impacted by these quarries are notified in
5 advance, they're made aware of where the quarries are
6 going to be, what the potential impacts to their
7 neighborhoods are going to be.]

2 8 [That quarry is south and a little west of my
9 house. I bet it's probably less than a mile as the bird
10 flies. I know if that quarry is very large, I'm going
11 to see dust, I'm going to see increased traffic, I'm
12 going to hear noise. There's going to be big trucks on
13 the road.

14 And that goes up into the Highland Knowles,
15 into the foothills that go uphill. So there's going to
16 be erosion concerns. These things need to be addressed,
17 and the people along the corridors where that

1
Continued

18 construction material is going to travel need to be
19 notified before any plans or any construction is done.]

20 [That's going to be a huge impact along the
21 Highway 93 corridor and to the -- appeal to the
22 communities of Highland Knowles, Indian Ridge, and
23 probably Beaver Dam, not to mention Panaca and Pioche as
24 they go north to build the railroad corridor. I'd like
25 to see that addressed by the county and by this EIS.]

37

1 Thank you.
