1 [You should not be surprised that people fear the effects of nuclear power. I live near Diablo Canyon in San Luis Obispo, California. When "Diablo" was first proposed the waste was purported to be of no concern because by the time it would be needed the issue would be resolved. Well it is not. My county will store it on site, above ground for no telling how long. The NRC is no more effective of an agency than FEMA and the myriad of other empty bureaucratic smoke screens we waste our tax dollars on. You should all be ashamed. I wish you all lived on the property because you deserve to.]

Thanks for nothing. Kim Dunn, Arroyo Grande, Ca.
